1. Operation of the fund

The Tasplan Superannuation Fund is a superannuation fund domiciled in Australia. Under the terms of the Fund's declaration of trust, Tasplan Pty Ltd (A.B.N. 13 009 563 062) is appointed trustee. The members' accounts are credited or debited each year with contributions and their proportionate share of the net investment income, expenses and income tax expense of the Fund.

The Fund is a hybrid fund with defined benefits, accumulation, and account based pension sections. The defined benefit sections are closed to new entrants. All other new entrants join the accumulation or allocated pension sections.

In accordance with the amendments to the Superannuation Industry (Superannuation) Act 1993 the Fund was registered with the Australian Prudential Regulation Authority on 19 August 1987 and was granted a RSE licence on 5 January 2006 (Licence Number L0000680).

The Fund entered into a binding memorandum of understanding on the 28 June 2019 with MTAA Super to investigate the opportunity of a merger.

2. Summary of significant accounting policies

(a) Basis of preparation

The financial statements are general purpose statements which have been prepared in accordance with Australian Accounting Standards, other authoritative pronouncements of the Australian Accounting Standards Board, the Superannuation Industry (Supervision) Act 1993 and regulations and the provisions of the Trust Deed.

The financial statements are presented in Australian dollars (which is the functional currency of the Fund).

The financial statements were authorised for issue by the Board of the Trustee on 13 September 2019.

(b) New accounting standards and interpretations

Certain new accounting standards and interpretations have been published that are not mandatory for the 30 June 2019 reporting periods and have not been early adopted by the Fund. These standards are not expected to have a material impact on the Fund in the current or future reporting periods and on foreseeable future transactions.

AASB 9: Financial Instruments (applicable current financial year)

This Standard addresses the classification, measurement and derecognition of financial assets and liabilities and replaces the multiple classification and measurement models in AASB139. The adoption did not result in a change to the classification or measurement of financial instruments as they remain at fair value in accordance with AASB 1056.

AASB 15: Revenue from Contracts with Customers (applicable current financial year)

This Standard has been applied using the cumulative effective method. There is however, no impact shown in the financials as the directors, having applied the five-step AASB 15 model, have assessed that there is no material difference for the Fund between applying AASB 118: Revenue and AASB 15.

AASB 16: Leases (applicable to annual reporting periods beginning on or after 1 January 2019)

This Standard removes the lease classification test for lessees and requires all leases (including operating leases) to be brought onto the balance sheet. The definition of a lease is also amended and is now the new on/off balance sheet test for lessees.

The Trustee anticipates that the adoption of AASB 16 will have an impact on the Fund's financial statements, this impact is likely to be minimal on the financial statements.

(c) Significant accounting judgements, estimates and assumptions

The preparation of the Fund's financial statements requires management to make judgements, estimates and assumptions that affect the amounts recognised in the financial statements. The judgements, estimates and associated assumptions are based on experience and various other factors that are believed to be reasonable in the circumstances, the results of which form the basis of making judgements about the carrying values of assets and liabilities where not available from independent sources. The key estimates and assumptions that have a significant risk of causing a material adjustment to the values of assets and liabilities are:

Valuation of accrued benefits which have been actuarially determined for the defined benefit plans - the key assumptions are set out in Note 4.

Valuation of Financial assets and financial liabilities - the key assumptions are set out in Note 2(d)

2. Summary of significant accounting policies (continued)

(c) Significant accounting judgements, estimates and assumptions (continued)

Entities that meet the definition of an investment entity within AASB 10: Consolidated Financial Statements are required to measure their subsidiaries at fair value through profit and loss rather than consolidate them. The criteria which define an investment entity are, as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

The Fund's product disclosure statement details its objective of providing services to members which includes investing in equities, fixed income securities and private equity for the purposes of returns in the form of investment income and capital appreciation.

The Fund reports to its members via an annual report, and to its management, via internal management reports, on a fair value basis. All investments are reported at fair value to the extent allowed by AASB 1056 in the Fund's annual report.

The Trustee has also concluded that the Fund meets the additional characteristics of an investment entity, in that it has more than one investment; the investments are predominantly in the form of equities and similar securities; it has more than one investor and its investors are not related parties.

The Trustee has therefore concluded that the Fund meets the definition of an investment entity. These conclusions will be reassessed on an annual basis, if any of these criteria or characteristics change.

(d) Financial assets and liabilities

Financial assets and financial liabilities at fair value in the profit and loss are initially recorded in the statement of financial position at fair value. All transaction costs are recognised directly in the income statement.

Loans and receivables and financial liabilities (other than those classified at fair value through the profit or loss) are measured initially at their fair value plus any directly attributable incremental costs of acquisition of issue.

For financial assets and liabilities where the fair value at initial recognition does not equal the transaction price, the Fund recognises the difference in the income statement, unless specified otherwise.

After initial measurement, the Fund measures investments and derivatives at fair value through the profit or loss. Subsequent changes in fair value of those investments are recorded as 'changes in fair value of investments' through the income statement.

Purchases and sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place are recognised on the trade date i.e. the date that the Fund commits to purchase the asset. From this date, any gains and losses arising from changes in the fair value are recorded.

A financial asset is derecognised when:

- The rights to receive cash flows from the asset have expired; or
- The Fund transfers substantially all the risks and rewards of ownership of the asset.

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires.

(e) Fair value measurement

Fair value is the price that would be received to sell the asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Fund.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the assets or liability, assuming that market participants act in their economic best interest.

2. Summary of significant accounting policies (continued)

(e) Fair value measurement (continued)

The Fund uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Fair value has been determined as follows: in the case of shares in listed companies, unit trusts and government and other fixed interest securities, by reference to relevant middle-market quotations; in the case of real estate properties, and fixtures and fittings, on the basis of independent valuations and in the case of mortgage loans, by reference to the outstanding principal of the loans.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy. Refer to Note 15.

(f) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Fund and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

Changes in fair values

Changes in the fair value of investments and derivatives are calculated as the difference between the fair value at sale, or at balance date, and the fair value at the previous valuation point. All changes are recognised in the income statement.

Group life recoveries

Group life recoveries are recognised when control of the asset has been attained and are recorded, gross of any tax.

Interest

Revenue is recognised as interest accrues using the effective interest method, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset.

Distributions and dividends

Revenue is recognised when the right to receive payment is established, which is the date the investments are quoted. Ex-distributions, if not received at the reporting date, are reflected in the income statement as part of the change in fair value of investments.

(g) Income tax

The Fund is a complying superannuation fund within the provisions of the Income Tax Assessment Act. Accordingly, the concessional tax rate of 15% has been applied.

Income tax in the income statement for the year comprises current and deferred tax.

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the current period's taxable income. The rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the balance date.

Deferred income tax is provided on all the temporary differences at the balance date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognised for all taxable temporary differences except where the deferred income tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

Deferred income tax assets are recognised for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry-forward of unused tax assets and unused tax losses can be utilised, except where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor the taxable profit or loss.

The carrying amount of deferred income tax assets is reviewed at each balance date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

2. Summary of significant accounting policies (continued)

(g) Income tax (continued)

Unrecognised deferred income tax assets are reassessed at each statement of financial position date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance date.

Deferred tax assets and deferred tax liabilities are offset only if a legally enforceable right exists to offset current tax assets against current tax liabilities and the deferred tax assets and liabilities relate to the same taxable entity and the same taxation authority.

(h) Goods and services tax (GST)

Revenues, expenses and assets, with the exception of receivables and payables, are recognised net of the amount of GST to the extent that the GST is recoverable from the taxation authority. Where GST is not recoverable, it is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable.

Receivables and payables are stated inclusive of GST.

The net amount of GST recoverable from the taxation authority is included as part of receivables in the statement of financial position.

Cash flows are included in the statement of cash flows on a gross basis. The GST component of cash flows arising from investing activities, which is recoverable from, or payable to, the taxation authority are classified as operating cash flows.

(i) Foreign currency

Transactions in foreign currencies are initially recorded in the functional currency at the exchange rates ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the reporting date.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in a previous financial report, are recognised in the income statement in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

(j) Benefits payable

Benefits payable are valued at net market value which comprises the entitlements of members who ceased employment prior to the year end but had not been paid at that time. Benefits payable are settled within 30 days.

(k) Receivables and other payables

Receivables are carried at nominal amounts due which approximate net market value. Receivables are normally settled within 30 days. An allowance for uncollectible amounts is only made where there is objective evidence that the debt will not be collected.

Other payables are recognised for amounts to be paid in the future for goods and services received, whether or not billed to the Fund and are carried at nominal amounts which approximate net market value. Payables are normally settled on 30 day term.

(I) Cash and cash equivalents

Cash and short-term deposits in the statement of financial position comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less.

For the purposes of the statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

2. Summary of significant accounting policies (continued)

(m) No-TFN contributions tax

Where a member does not provide their tax file number to the Fund, the Fund may be required to pay a no-TFN contributions tax at a rate of 34% which is in addition to the concessional tax rate of 15% which applies to the Fund's taxable income.

The no-TFN contributions tax liability recognised by the Fund will be charged to the relevant members' accounts. Where a tax offset is obtained by the Fund in relation to members' no-TFN contributions tax, the tax offset will be included in the relevant members' accounts.

(n) Excess contributions tax

The Australian Taxation Office may issue release authorities to members of Tasplan Super relating to the relevant member's excess contributions tax that is payable in respect of the member's concessional and/or non-concessional contributions for a particular year. Where a member receives an excess contributions tax release authority, the member:

- May give the release authority relating to the member's concessional contributions to a fund for payment; and
- Must give the release authority relating to the member's non-concessional contributions to a fund for payment.

The liability for the excess contribution tax will be recognised when the relevant release authorities are received from the members, as the Trustee considers this is when it can be reliably measured.

The excess contributions tax liability recognised by the Fund will be charged to the relevant members' accounts.

(o) Fixed assets

Fixed assets are stated at cost less accumulated depreciation and impairment losses. Fixed assets are depreciated using either straight line or diminishing value methods over their effective lives. The low value pool rules are used to depreciate assets costing less than \$1,000. Assets costing less than \$100 are expensed in the year of purchase. Depreciation methods, useful lives and residual values are re-assessed at each reporting date.

Major depreciation periods are:

Office Fit-out Office Equipment 3 - 8 years

3 - 10 years

Office Furniture

4 - 10 years

(p) Intangible assets

Software and development expenditure is capitalised only if development costs can be measured reliably and the Fund intends to have sufficient resources to complete development and to use the asset. The expenditure capitalised includes the cost of consultants and labour that are directly attributable to preparing the asset for its intended use. Capitalised development expenditure is measured at fair value which is deemed to be cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised in the income statement on a straight line basis over the estimated useful lives of intangible assets, from the date they are available for use. The estimated useful lives for the current period for intangible assets is 2.5 - 5 years.

(q) Treatment of merger related costs

Acquisition costs such as advisory, legal, accounting, valuation, professional and consulting fees and general administrative costs are recorded as expenses in the period in which the costs are incurred and services are rendered.

(r) Comparative figures

Previous year's figures have been reworked, regrouped and reclassified wherever necessary, to conform to current year's classification and presentation.

The Trustee maintains an operational risk reserve, an administration reserve, a strategic development reserve and an unallocated reserve to provide the Trustee with access to funds to protect members' interests and mitigate the impact of an adverse event. These reserves are operated in accordance with the Fund's reserving policies and are held at Fund level.

(t) Leases

Leases are classified at their inception as either an operating lease or finance lease based on the economic substance of the agreement so as to reflect the risks and benefits incidental to ownership.

3. Investments and derivatives

The investments and derivatives of the Fund (including cash & short term deposits) are managed on behalf of the Trustee by selected investment managers. The Custodian holding the shares and fixed interest securities is National Nominees Ltd.

4. Member liabilities

(a) Defined contribution member liabilities

Defined contribution member account balances are determined by unit prices that are based on the underlying investment movements

Defined contribution members bear the investment risk relating to the underlying assets and unit prices are used to measure the member liabilities. Unit prices are updated daily.

(b) Defined benefit member liabilities

Defined benefit member liabilities are measured as the amount of a portfolio of investments that would be needed as at the reporting date to yield future net cash inflows that would be sufficient to meet accrued benefits as at the date when they are expected to fall due. The amount of accrued benefits has been determined on the basis of the present value of the expected future payments which arise from membership of the Fund up to the measurement date. The figure reported has been determined by reference to the expected future salary levels and by application of a market-based, risk-adjusted discount rate and relevant actuarial assumptions. The valuation of the defined benefit member liabilities is performed by the Fund's appointed Actuary on an annual basis for each of its defined benefit sub funds. The Fund has three sub funds being Quadrant Defined Benefits Fund, Hobart City Council Defined Benefits Fund and Launceston City Council Defined Benefits Fund.

The actuarial value of the defined benefit member liability reflects an actuarial assessment of benefits accrued up to the date of calculation and payable to members on resignation, retirement, death and disablement. This assessment may result in an employer being required to make additional contributions to the sub fund. Each sub fund is quarantined from the others and the other assets of the Fund. In the event that the assets of a particular sub fund is not adequate to meet the member's liabilities and that there are insufficient employer contributions, the defined benefit member liabilities are limited to the assets of the particular sub fund.

The main assumptions used to determine the values of the accrued benefits for each of the Fund's sub funds were:

Future rate of investment return of investments forecasted for each defined benefit sub fund as follows:

- Quadrant Defined Benefits Fund 3.75% per annum (2018: 3.75%)
- Hobart City Council Defined Benefits Fund 5.25% per annum (2018: 5.25%)
- Launcestion City Council Defined Benefits Fund 5.25% per annum (2018: 5.25%)
- Future rate of salary increase forecasted at 4% per annum (2018: 4%)

The Fund's Actuary considers the following movements in the main assumptions used to determine the values of the accrued benefits are reasonably possible for the 2018-19 reporting period:

- Future rate of investment return +/- 1% (2018: +/- 1%)
- Future rate of salary increase +/- 1% (2018: +/- 1%)

The impact of the reasonably possible changes in these key assumptions are shown below:

| Reasonable possible change in key assumptions | DB member liabilities \$'000 |
|---|------------------------------|
| Increase/ (decrease) in future rate of investment return +/- 1% and no change in future rate of salary increase | 2019: 151,893 / (155,423) |
| Increase/ (decrease) in future rate of salary increase by +/- 1% and no change in future rate of | 2018: 151,061 / (154,733) |
| investment returns | 2019: 155,434 / (151,848) |
| Increase/ (decrease) in future rate of investment return +/- 1% and increase/ (decrease) in | 2018: 154,745 / (151,015) |
| future rate of salary increase by +/- 1% | 2019: 307,327 / (307,271) |
| The of salary increase by 17-176 | 2018: 305,806 / (305,748) |

The amount of the vested benefits attributable to defined benefit members as at 30 June 2019 is \$159,111,062 (2018: \$157,091,551)

Increase/(decrease) in

4. Member liabilities (continued)

(b) Defined benefit member liabilities (continued)

The following table may provide some assistance in summarising the financial condition of the sub-funds:

| Sub-funds | Effective date of last actuarial review (valuation date) | Actuarial value of accrued benefits for defined benefit members at valuation date | Actuarial value of accrued benefits for defined contribution members at valuation date | Vested benefits for defined benefit members at valuation date | Net assets for defined benefit member at valuation date | Over funded |
|----------------------------|--|---|--|---|--|-------------|
| Quadrant | 30/06/2019 | 39,133,223 | 7,461,542 | 47,319,438 | 56,638,968 | 10,044,203 |

| Total | | 118,827,896 | 34,009,182 | 157,091,551 | 172,185,488 | 19,348,410 |

^{*}In the Actuary's opinion all the sub funds at valuation date were in a satisfactory financial condition

5. Funding arrangements

Employers provided contributions with respect of defined contribution members at a rate of 9.5% (2018: 9.5%) of the gross salaries of the employees. Members contributions were made in accordance with the requirements of the Trust Deed pursuant to applications contained in the product disclosure statements and supplements on issue by the Trustee during the year.

The funding policy adopted in respect of the Fund is directed at ensuring that benefits accruing to members and beneficiaries are fully funded as the benefits fall due. As such, in framing employer contribution rates for the defined benefit funds, the Actuary has considered long-term trends in such factors as Fund membership, salary growth and average market value of Fund assets.

The employers contributing to the defined benefit funds contribute at the rates recommended by the Actuary. The contribution rates are:

| Categories | % of salary |
|---|--------------|
| Quadrant Defined Benefits Fund | • |
| Employer contributions | 0* |
| Member contributions | 6.0 |
| Hobart City Council Defined Benefits Fund | |
| Employer contributions | 6.0-9.5** |
| Member contributions | 6.0 |
| Launceston City Council Defined Benefits Fund | |
| Employer contributions | 11.0-14.5*** |
| Member contributions | 6.0 |

^{*}Quadrant Defined Benefits Fund on the Actuary's recommendation went on a contribution holiday from 1 July 2018 to 30 June 2021.

^{**}Hobart City Council's contribution rate is 9.5%. TasWater's contribution rate is 6.0%.

6. Reserves

Operational risk financial requirements reserve (ORFR reserve)

The ORFR reserve is operated in accordance with an operational risk financial requirement reserve policy. The ORFR provides funds to address losses arising from operational risks that may affect Tasplan's business operations. The ORFR is the target amount of financial resources that Tasplan determines is necessary to respond to these losses. Tasplan has determined that the target amount for this reserve should be 0.25% of the total asset value of the Fund, with a tolerance range of +/- 0.10%.

Unallocated reserve

This reserve holds the unallocated investment revenue and net amount from the fund operations for the current financial year. Investment earnings are allocated to members accounts via the unit pricing process as soon as the valuation information is available. However due to the time lag in receiving certain valuations, there will always be a timing difference between the valuations used for allocation to member accounts and that reflected in the financial statements. The difference is the investment earnings not yet allocated and can be positive or negative.

Strategic development reserve

The strategic development reserve is designed to fund initiatives to ensure that Tasplan is able to continually develop in line with the needs of members. These reserves are managed in accordance with the Tasplan Reserving Policy and are separately identifiable from member accounts, provisions and the other reserves. There is no minimum or target level requirement for this reserve.

Administration reserve

This reserve provides funds to pay for the operating expenses required to manage and meet unforeseen contingencies of a complying industry fund that has an employer sponsor, public offer and pension divisions. This reserve includes the balance that is required to be maintained under the RSE licence plus accumulation of annual surpluses. The target range for this reserve is 0.30% to 0.75% of Tasplan's net assets. The final balance of this reserve is set by the Trustee having regard for prevailing market conditions, any identified fund manager issues, other reserve balances held and statutory requirements.

| | | 02,040,129 |
| Closing cash balance | 127,691,471 | 116,470,582 |

Cash at bank earns interest at floating rates based on daily bank deposit rates.

Cash & short term deposits are made for varying periods of between one day and one month depending on the immediate cash requirements of the Fund, and earn interest at the respective short term deposit rates.

c) Non cash investing activities

During the year, distributions of \$327,539,292 (2018: \$317,234,476) were received which were reinvested by way of acquiring units in unit trusts on normal commercial terms and conditions.

11. Related parties

(a) Trustee and key management personnel

The Trustee of the Fund is Tasplan Pty Ltd, the directors of which are:

Chair

Edwards, Naomi

Arnold, Paul Barta, Frank

Donohue, Patricia (appointed 1 January 2019)

Madsen, Roslyn Mazengarb, John Munday, Jessica Parr, Susan

Scullin, Brian (resigned 30 November 2018)

Walsh, Stephen

In addition to the Trustee and directors, the following individuals were key management personnel during the year ended 30 June 2019.

Davy, Wayne (CEO)

Connor, Nicholas (Chief Operations Officer)

Lundy, Ian (Chief Investment Officer) (resigned 5 March 2019)

Williams, Mark (Head of Investments) (appointed 6 March 2019)

Lyons, Ningning (Chief Financial Officer) (maternity leave commenced 31 March 2019)

Lim, Sha May (Acting Chief Financial Officer) (appointed 1 April 2019)

Welch, Keryn (Executive Manager Strategy)

Hanigan, Gregory (Chief Risk Officer & Company Secretary) (Company Secretary ceased 15 February 2019)

Judd, Robyn (Executive Manager People & Culture)

The RSE licence was granted on 5 January 2006 (licence no L0000680).

(b) Compensation of key management personnel

Directors and key management personnel compensation are paid by the Fund on behalf of the Trustee Company. No other payments are made in connection with the management of the Fund.

| | 2019 \$ | 2018 \$ |
|--|-------------------------------|-------------------------|
| Short term benefits Post employment benefits Other long term benefits Termination benefits | 2,920,382 74,194 43,284 | 3,279,205 - 26,048 - |
| | 3,037,860 | 3,305,253 |

Transactions between directors and the superannuation fund were transacted under normal terms and conditions with expenses incurred by the directors on the Fund's behalf fully reimbursed.

(c) Related party transactions

Trustee

Tasplan Pty Ltd invoiced Tasplan Super the amount (inclusive of GST) of \$1,086,107 (2018: \$1,046,559) during the 2019 year for expenses incurred on behalf of the trustee company.

Key management personnel

Certain directors and key management personnel are members of the Fund. Their membership terms and conditions are the same as those available to other members of the Fund.

The following directors and key management personnel are members of the Fund.

Barta, Frank Connor, Nicholas Davy, Wayne Hanigan, Gregory Judd, Robyn Lim, Sha May Madsen, Roslyn Parr, Susan Welch, Keryn Williams, Mark

11. Related parties (continued)

(c) Related party transactions (continued)

Other related party transactions

The Fund's related parties include: Quadrant First Pty Ltd

Subsidiary company that provides financial services

Quadrant First Pty Ltd

During the year, the Fund charged Quadrant First Pty Ltd (QFPL) \$190,000 of service fees for administration and other services provided to QFPL. At 30 June 2019, \$26,583 was receivable from QFPL. The Fund paid QFPL \$379,681 for the provision of financial planning services including the provision of authorisations to employees of the Fund. At 30 June 2019 \$21,312 was payable to QFPL.

QT Administration Pty Ltd

Due to an internal management decision, the administration was moved back into the Fund in March 2018. As a result administrator expenses are shown as nil and operating expenses have increased by a corresponding amount in the Income Statement.

Tasplan Superannuation Fund holds 100% of the units in QT Investment Management Trust (unit trust). During the year, the Fund received \$5,566,563 in income distributions.

Tasplan Superannuation Fund holds 100% of the units in Tasplan Property Trust (unit trust). During the year, the Fund received \$2,785,939 in income distributions.

Tasplan Superannuation Fund has not consolidated these controlled entities in accordance with the investment entity exemption under AASB10 Consolidated Financial Statements. All controlled entities have a principal place of business in Hobart (Tasmania). There are no material restrictions or commitments relating to these controlled entities.

12. Insurance

The Fund provides death and disability benefits to members. These benefits are greater than the members' vested benefit. The Trustee has taken out insurance to cover the part of the benefit in excess of the vested benefit.

13. Segment information

The Fund operates solely in one reportable business segment, being the provision of benefits to members. The Fund also operates from one reportable geographic segment, being Australia, from where its activities are managed. Revenue is derived from interest, distributions, other investment income, gains on the sale of investments, unrealised changes in the value of investments and contributions revenue.

14. Contingent liabilities

There are no contingent liabilities.

15. Financial risk management

(a) Strategy in using financial instruments

The Fund's principal financial instruments, comprise individual mandates and units in managed trusts which invest in equity securities, fixed interest securities, property, infrastructure, private equity, hedge funds, cash and short term deposits. The main purpose of these financial instruments is to generate a return on investment.

The Fund also has various other financial instruments such as sundry receivables and payables, which arise directly from its operations.

Investment managers may use derivatives where the Trustee deems this appropriate and where it is documented in the investment mandate with the individual manager. The investment managers provide the Trustee with detailed risk management statements which outline their approach to derivatives and confirm their approach is applicable to the investments they manage.

The Trustee monitors investment managers to confirm that the use of derivatives accords with the overall investment strategy of Tasplan and is consistent with the performance objectives of each portfolio and sub-fund.

The Trustee may, when it deems it appropriate, use its custodian to enter into forward exchange contracts to reduce or remove any foreign currency exposures which are not already hedged by its international investment managers or the currency hedging manager.

The main risks arising from the Fund's financial instruments are interest rate risk, credit risk, market price risk and foreign currency risk. The Trustee reviews and agrees policies for managing each of these risks and they are summarised below. The Fund also monitors the market price risk arising from all financial instruments.

The Fund's accounting policies in relation to derivatives are set out in note 2.

(b) Market price risk

Market price risk represents the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all instruments in the market

Market risk is minimised through ensuring that all investment activities are undertaken in accordance with established mandate limits and investment strategies.

(c) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in raising funds to meet commitments associated with financial instruments.

To control liquidity, the majority of the Fund's assets are invested in financial instruments, which under normal market conditions are readily convertible to cash. These investments include listed equities, cash and fixed interest investments. The Fund's investment options (excluding Property) are all highly liquid with more that 74% of each investment option (excluding Property) able to be liquidated within 30 days under a steady state and stressed market conditions. The Fund's property investment option is illiquid in nature. In addition, the Fund maintains sufficient cash and cash equivalents to meet normal operating requirements.

The Fund's significant financial liabilities are benefits payable to members. In addition to vested superannuation benefits, these would be considered on demand, which payments comprise the entire defined contribution component and the vested portion of the defined benefit component.

The Fund manages its obligation to pay the defined contribution component on an expected maturity basis based on management's estimates and actuarial assumptions of when such funds will be drawn down by members. The Fund considers it is highly unlikely that all defined contribution members will request to roll-over their superannuation fund account at the same time. Furthermore, in relation to the vested defined benefit component, the Fund has adequate resources readily convertible to cash to satisfactorily meet these obligations when called upon.

The following are the contracted maturities of financial liabilities:

| | 30 June 2019 | Carrying \$ | Contractual | Less than 1 Month \$ | 1-3 Months |
|---|------------------|----------------|---------------|----------------------------|------------|
| 1 | Accounts Payable | 4,791,735 | 4,791,735 | 4,791,735 | - |

| | 8,515,902,003 | 8,515,902,003 | 8,515,684,635 | 217,368 |

(d) Other price risk

Other price risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. The maximum risk resulting from financial instruments is determined by the fair value of the financial instruments.

The Fund is exposed to the price risk relating to changes in the net market value of the respective investment options held by the Fund, namely unit trusts, equity prices, fixed interest and discount securities as well as infrastructure and direct property valuations. Any changes in the net market value of these investments are due to movements in the price of the underlying assets that the fund invests in and the volatility of those assets.

The Trustee, through Mercer as the appointed Asset Consultant, moderates this risk through diversification and the careful selection of investment managers who trade in securities and other financial instruments within specified limits. The Fund's overall market positions are monitored on a monthly basis by the Trustee. In addition, the Board reviews each investment manager in detail each quarter to ensure that performance is within expectations and ranges of the specific mandate.

The asset allocation ranges for each investment sector have been determined by the Trustee in consultation with Mercer. These ranges have been set to ensure the appropriate overall fund risk/return ratio is maintained and to ensure satisfactory diversification across sectors. Investments in each sector are spread over more than one security manager. In this way the Fund is not overly exposed to one manager, or underlying economic event. This approach is designed to produce a moderate out performance over time. The asset allocation of the Investment Options are monitored monthly and rebalanced to the target on a regular basis.

Sensitivity analysis for price movements

The volatility of expected returns for the purpose of this analysis has been based on historical analysis and input from Mercer in collaboration with the Trustee. The following table represents the returns that would be considered reasonably possible based on the underlying asset classes as at 30 June 2019 and 30 June 2018.

| | Carrying | Movement in | Increase | Decrease |

(e) Interest rate risk

Interest rate risk represents the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Fund's exposure to market risk for changes in interest rates relate primarily to investments held in discount securities and interest bearing securities.

The Fund's policy is to invest in fixed interest as a diversifying strategy as well as moderate the volatility of the expected returns of the Fund.

The risks within the fixed interest Investments lie in the duration and credit limits held by the investment managers. Managers are subject to strict guidelines with regard to both parameters and they are monitored regularly by the Trustee in conjunction with Mercer.

15. Financial risk management (continued)

(e) Interest rate risk (continued)

The following table sets out the carrying amount, by maturity, of the Fund's financial instruments that are exposed to interest rate risk.

| 2019 | Floating | Fixed Interest Rate - Time to Maturity | | | | |
|---|----------|--|-------------|---------|--------------|-----------|
| | Interest | 1 Year or | 1 - 5 Years | Over 5 | Non Interest | Total |

15. Financial risk management (continued)

(e) Interest rate risk (continued)

Interest on financial instruments classified as floating rate is repriced at intervals of less than one year. Interest on financial instruments classified as fixed rate is fixed until maturity of the instrument.

The other financial instruments of the Fund that are not included in the above tables are non-interest bearing and therefore not subject to interest rate risk.

The following table demonstrates the sensitivity of the Fund's income statement, to a reasonably possible change in interest rates. The sensitivity for cash has been estimated using a 0.25% change in interest rates. The change in net assets for diversified fixed interest has been determined by taking the product of the weighted change in the interest rate, the duration, and the net market value for each investment, whereby the investment change and duration for each investment has been based on the average duration and standard deviation of the index used by each investment.

| 2019 Curre | cy Interest Bearing Instruments | Change in Interest Rate Increase / Decrease | Sensitivity on Interest Income and Changes on Net Assets Increase / Decrease |
|------------|---------------------------------|--|---|
| AUD | Cash | +/- 0.25% | +/- \$25,724,975 |
| AUD | Diversified Fixed Interest | +/- 0.92% | +/- \$601,810,220 |

| 2018 | Currency | Interest Bearing Instruments | Change in Basis Points Increase / Decrease | Sensitivity on Interest Income and Changes on Net Assets Increase / Decrease |
|------|----------|------------------------------|---|---|

(f) Foreign currency risk

Foreign currency risk is the risk that the value of a financial instrument will fluctuate because of changes in foreign exchange rates. The Fund has exposure to foreign currency risk implicit in the value of portfolio securities denominated in a foreign currency.

For listed equity exposures, the level of foreign currency exposure is managed via allocations between hedged and unhedged funds. In addition, there are unhedged foreign currency exposures in the Private Equity, Emerging Market Local Currency Debt, and Infrastructure asset classes. The Fund relies on fund managers to hedge into Australian dollars those foreign currency exposures in hedged equity, bond and credit investments, and a range of diverse assets within the Absolute Return portfolios.

The level of foreign currency exposure of the Fund is adjusted utilising advice provided by the Asset Consultant through their Dynamic Asset Allocation service. As of June 2019, Tasplan's Balanced Investment Option had approximately 29% exposure to foreign currencies.

The Trustee sets the level of exposure to foreign currencies for each investment strategy of the Fund. The Fund's currency risk is managed through currency hedge arrangements for each foreign domiciled investment. International assets held through pooled trusts are hedged within the trust. The Fund directly hedges currency exposures that are not managed by an external investment vehicle.

For 2019, the currency risk directly managed by the Fund consists of three parts:

The Fund hedges 100% (2018: 100%) of its foreign currency exposure in structured credit denominated in foreign currency held within the alternative debt asset class.

The Fund hedges 100% (2018: 100%) of its foreign currency exposure in absolute return denominated in foreign currency.

The Fund hedges 19% (2018: 25%) of the foreign currency exposure of the international equities investment class, effectively managing the risk back to 81% (2018: 75%) of international equity.

As at 30 June 2019, the exposure was approximately 26% (2018: 20%) of the investments assets of the defined contribution scheme and 22% (2018: 15%) of the investment assets of the defined benefit sub-funds. This direct hedging program is conducted by a specialist currency manager.

The majority of the Fund's unhedged currency exposure is contained within the international equities asset class. Currency exposures held in other asset classes are hedged either by investment managers or by the specialist currency hedging manager.

15. Financial risk management (continued)

(f) Foreign currency risk (continued)

The Fund's total net exposure to fluctuations in foreign currency exchange rates at the balance date was as follows:

| 2019 | USD | EURO | Yen | AUD | Other | Total |
|-----------------------------|-------------|-----------|----------|-----------|-----------|------------|
| | \$'000 | \$'000 | \$'000 | \$'000 | \$'000 | \$'000 |

(g) Credit risk

Credit risk represents the risk that the counterparty to the financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss.

With respect to credit risk arising from the financial assets of the Fund, other than derivatives, the Fund's exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amount of these investments.

In relation to derivative financial instruments, whether recognised or unrecognised, credit risk arises from the potential failure of counterparties to meet their obligations under the contract or arrangement. The risk associated with these contracts is minimised by undertaking transactions with counterparties on recognised exchanges, and ensuring that transactions are undertaken with a large number of counterparties.

There are no significant concentrations of credit risk within the Fund.

15. Financial risk management (continued)

(h) Fair values

The Fund's financial assets and liabilities adopted in the statement of financial position are carried at their fair value. Refer to note 2 for the methods and assumptions adopted in determining the fair values of investments and derivatives.

All financial instruments that are measured at fair value in the Statement of Financial Position must now be classified into a three-level fair value hierarchy.

Descriptions of the various hierarchy levels are set out below:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities. These inputs are readily available in the market and are normally obtainable from multiple sources.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable in a market for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). These inputs must be observable for substantially the full term of the financial instrument.

Level 3 - Valuation techniques for which any significant input is not based on observable market data. This includes any instrument that is not categorised in Level 1 or Level 2.

(i) Valuation process for Level 3 valuations

Valuations are the responsibility of the board of directors of the Trustee.

The valuation of unlisted unit trusts and asset back securities are performed on a half yearly basis by the valuation department of the investment manager and reviewed by Tasplan's investment team. The valuation of unlisted direct investments is completed internally on monthly basis by the Finance department and reviewed by Tasplan's investments team.

The valuations are also subject to quality assurance procedures performed by Tasplan's investment team either on a monthly or six monthly basis depending on timing on investment valuations. Tasplan's in-house investment team verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to relevant documents and market information. In addition, the accuracy of the computation is tested. The latest valuation is also compared with the valuations in the preceding periods as well as

^{*} The fair value of the asset would increase/decrease if the discount rate decreases/increases. The fair value of the asset would increase/decrease if the other inputs increase/decrease.

16. Subsequent events

There have been no matters or circumstances not otherwise dealt with in the financial report that have significantly affected or may significantly affect the Fund.

^{**} The sensitivity analysis refers to a percentage amount added or deducted from the significant unobservable input and the effect this has on the fair value.

17. Operating commitments

The Trustee participates in non-cancellable lease arrangements for motor vehicles it uses.

Under these arrangements the Trustee:

- Is not required to purchase the motor vehicles at the end of the lease period;
- The lessees' are RedZed Lending Solutions Pty Ltd and Lease Express Pty Ltd and the lessor is the Tasplan Super; and
- There are no restrictions imposed by the lease arrangements.

The Trustee currently leases five office spaces.

Under these arrangements the Trustee:

- Holds a lease at Levels 6, 7 and 8,188 Collins Street, Hobart which ceases in 2024;
- Holds a lease at Ground Floor, 113-115 Cimitiere St, Launceston which ceases in 2022;
- Holds a lease at 89 Cambridge Park, Cambridge which ceases in 2023;
- Holds two leases at First Floor Cnr, Edward and Best Street, Devonport which ceases in 2021; and
- Holds a lease at 47 Villiers Street, North Parramatta which ceases in 2019.

The total amount of lease expense recognised in the financial statements in the financial year was:

| | 2019 \$ | 2018 |
|---|-----------------------------|-----------------------------------|
| Lease expense recognised | 1,305,806 | 1,285,631 |
| The minimum lease payments under the lease are: | 2019 \$ | 2018 |

| There are no contingent leases. | 6,809,607 | 7,457,547 |

Tasplan Superannuation Fund

Statement by Trustee

In accordance with a resolution of the Board of Directors of the trustee company, we declare that in the opinion of the directors of Tasplan Pty Ltd:

- (a) The accompanying financial statements of the Tasplan Superannuation Fund are properly drawn up so as to present fairly the Statement of Financial Position of the Fund as at 30 June 2019 and the results of its operations and cash flows for the year reporting requirements;
- (b) The accompanying Income Statement and Statement of Changes in Member Benefits are drawn up so as to present fairly the benefits accrued as a result of operations for the year then ended;
- (c) The Fund has been conducted in accordance with its constituent Trust Deed and the requirements of the Superannuation Industry (Supervision) Act 1993 the Corporations Act 2001 during the year; and
- (d) There are reasonable grounds to believe that the Trust will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of the Board of Directors of Tasplan Pty Ltd (A.B.N. 13 009 563 062).

Dated 13 September 2019.

Hobart, Tasmania

Director Naomi Edwards

Director John Mazengarb

Auditor's Independence Declaration to the Trustees of Tasplan Superannuation Fund

As lead auditor for the audit of Tasplan Superannuation Fund for the financial year ended 30 June 2019, I declare to the best of my knowledge and belief, there have been:

- a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- b) no contraventions of any applicable code of professional conduct in relation to the audit.

Independent Auditor's report approved form for an RSE which is a reporting entity

Tasplan Superannuation Fund – ABN 14 602 032 302

Report by the RSE Auditor to the Trustee

Opinion

I have audited the financial statements of Tasplan Superannuation Fund for the year ended 30 June 2019 comprising the Statement of financial position, Income statement, Statement of changes in member benefits, Statement of changes in reserves and Statement of cash flows.

In my opinion the financial statements present fairly, in all material respects, in accordance with Australian Accounting Standards the financial position of Tasplan Superannuation Fund as at 30 June 2019 and the results of its operations, cash flows, changes in reserves and changes in members' benefits for the year ended 30 June 2019.

Basis for Opinion

I conducted the audit in accordance with Australian Auditing Standards. My responsibilities under those standards are further described in the *Auditor's responsibilities* section of my report. I am independent of the entity in accordance with the auditor independence requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants* (the Code) that are relevant to my audit of the financial statements in Australia. I have also fulfilled my other ethical responsibilities in accordance with the Code.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Responsibilities of the Trustee for the Financial Statements

The RSE's trustee is responsible for the preparation and fair presentation of the financial statements in accordance with Australian Accounting Standards and the requirements of the *Superannuation Industry (Supervision) Act 1993* (SIS Act) and the *Superannuation Industry (Supervision) Regulations 1994* (SIS Regulations). The trustee is also responsible for such internal control as the trustee determines is necessary to enable the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the trustee is responsible for assessing the ability of the RSE to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the trustee either intends to liquidate the RSE or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Australian Auditing Standards, I exercised professional judgment and maintained professional scepticism throughout the audit. I also:

Liability limited by a scheme approved under Professional Standards Legislation.

- Identified and assessed the risks of material misstatement of the financial statements, whether due to fraud or error, designed and performed audit procedures responsive to those risks, and obtained audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtained an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the RSE's internal control.
- Evaluated the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the trustee.
- Concluded on the appropriateness of the trustee's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the RSE's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my auditor opinion. My auditor conclusions are based on the audit evidence obtained up to the date of my audit report. However, future events or conditions may cause the RSE to cease to continue as a going concern.
- Evaluated the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Communicated with the trustee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identified during my audit.
